### **London Machinery Inc. Approves Non-D.O.T. Regulated Ready-Mix Truck Wash & Wax**

#### ***Drivers and Environment Benefit Greatly***

Las Vegas, NV, October 28, 2002 - London Machinery Inc. has approved a chemical cleaner that is powerful enough to remove concrete from ready-mix trucks, yet gentle on the drivers and the environment. EL-ReadyMix Truck Wash & Wax, developed by EMS, Environmental Manufacturing Solutions, L.L.C. and tested in conjunction with Mack trucks, Inc. for over a year, is guaranteed not to void London's rust and corrosion warranty. In addition to London's warranty, EL-ReadyMix Truck Wash & Wax is guaranteed not to void Mack's five year – or prior three year – rust and corrosion warranty.

This is the first time London has ever put its name and this type of endorsement behind a concrete cleaner/wash. EL-ReadyMix Truck Wash & Wax in conjunction with Mack Trucks, Inc. has undergone over a year of testing both in the field and analytically, it is now proven to be driver and environmentally safe and is effective in removing concrete, rust and also acting as a rust inhibitor and waxing agent.

EL-ReadyMix Truck Wash & Wax is strong enough to effectively remove hardened concrete from the mixer, it self neutralizes when rinsed away with water and leaves behind a layer of natural bean waxes, but yet is safe enough to gain NON-D.O.T. Regulation status along with an A3 Code from USDA.

In addition, not only did EL-ReadyMix Truck Wash & Wax consistently remove all traces of concrete, but it also performed extremely well in cleaning the rest of the truck with no resulting damage to chrome, aluminum and glass components.

EMS, Environmental Manufacturing Solutions, L.L.C., concerns over safety extended far beyond the vehicle, when EMS formulated EL-ReadyMix Truck Wash & Wax they did so with the mandate that no personal protection gear needs to be worn during its use.

**EL-ReadyMix Truck Wash & Wax is the safest product on the market today for the drivers, the truck, the mixer, and the environment.**

London expects to make EL-ReadyMix Truck Wash & Wax available to all its customers through all London locations in both the U.S. and Canada by the end of the first quarter of this year.

Dedicated to the quality & reliability of our mixers and our continual obligations to aid in preserving our precious environment, London Machinery, Inc is confident that endorsing EMS, Environmental Manufacturing Solutions, L.L.C. and their product, EL-ReadyMix Truck Wash & Wax, is a step in the right direction for both the benefit of London's customers and the Environment we all live, work and play in.
